TO WHOM IT MAY CONCERN

Mike Menhinick has worked at Fisher & Paykel Production Machinery Limited from the 4th of January 1989 to the 9th of June 1995.

Initially Mike was employed as a Machine Designer and was typically involved with the complete design of a machine, from initial concept through to complete detail drawings. Mike's thorough approach to designing ensured that machines generally assembled easily and commissioned without significant problems.

In 1992 he was promoted to Design Manager, in which capacity he was responsible for the day to day administration and technical direction of the design office. During this time the design staff increased from 10 to 21 designers, working on two shifts and at times up to 10 contract staff.

Whilst Mike's greatest strengths are his excellent conceptual ability, combined with an eye for technical detail, he has also brought good organisational skills to the job.

I have no hesitation in recommending Mike on either a technical or personal basis, knowing he will always give his best to any future employer.

Neville Seagar
CHIEF ENGINEER
